

Networked Specification Management

Bring it all together with collaborative specifications.

The World Today

Specs are one of the things that you can't afford to get wrong. But working with multiple suppliers and internal teams creates endless possibilities for miscommunication, misalignment and delay.

Your World Tomorrow

Digital specification management gets everyone on the same page. Centralize, version and organize specifications on one platform, so that you can collaborate smoothly both internally and with suppliers. In-depth reporting and change management tools keep everything in order, for materials and finished goods.

What We Provide

- Author and manage specifications with configurable templates.
- Link specifications to networked ingredient and supplier data, including global networked intelligence.
- Automate Workflows, enabling repeatable business processes with reporting and alert capabilities.

Why We're Different

Networked Specification Management provides a common language for brands, manufacturers and suppliers, all connected by the industry's most powerful network. Whether managing material or finished good specifications, accelerate collaboration without adding risk.

**Global visibility.
Real world relevance.**
